The Steel Shop - Puts One on Ice

Challenged with a unique problem, The Steel Shop completes a New Cold Storage Building for Rocky Produce.

Detroit, MI. – The Steel Shop, a turnkey design and build company specializing in steel fabrication and construction for the food and manufacturing industry, overcomes a unique problem to complete construction of a new cold storage building for Rocky Produce located in the Food Terminal – at Eastern Market.

The Steel Shop's project engineers incorporated specific structural designs that enable the building to be kept at a -20° below zero temperature, simultaneously insulating the ground in order to prevent heaving.

The Steel Shop maintains an in-house staff of quality and dedicated Professional Licensed Engineers, Certified Welders and a fully staffed and equipped fabrication shop that includes steel sheers, press brakes, pipe benders, and more. As a turnkey supplier, the company controls all aspects of the construction process from the anchor bolts up.

The Steel Shop has offices located in Michigan, Alabama, and Kentucky, enabling them to serve clients with a continuity of service regardless of where new business expansions might take them within the continental United States.
